## OUR LOCATIONS

### California

1413 E. Philadelphia St.  
Ontario, CA 91761  
Toll free (844) 573-0854  
Phone (909) 939-2581  
Fax (909) 891-0434

### Florida

6448 Pinecastle Blvd., Suite 105  
Orlando, FL 32809  
Toll free (877) 544-4211  
Phone (407) 792-2670  
Fax (407) 286-2956

### Georgia

1725 Corporate Dr., Suite 340  
Norcross, GA 30093  
Toll free (888) 448-4430  
Phone (770) 279-8755  
Fax (770) 279-8499

### Minnesota

205 16th St. NE., Suite A  
Little Falls, MN 56345  
Phone (320) 616-0701  
Fax (320) 631-0064

### Missouri

4061 Wedgeway Ct.  
Earth City, MO 63045  
Toll free (877) 699-2159  
Phone (314) 282-2740  
Fax (314) 770-0687

### New Jersey

9 Astro Place, Unit #3  
Rockaway, NJ 07866  
Toll free (888) 379-0371  
Phone (862) 254-8000  
Fax (862) 210-6000

### Wisconsin

7575 Bombardier Ct., Suite 300  
Wausau, WI 54401

## INDUSTRIES & MARKETS

### DIRECT PUSH - PROBE

---

A full line of Geoprobe® compatible direct push tooling and accessories innovatively designed and manufactured to provide consistency, durability, and longevity. Large inventory, multiple stocking locations, local delivery, and global logistical solutions.

### ENVIRONMENTAL & GEOTECHNICAL

---

Auger tools, rods and subs, bits, sampling equipment, well completion products, and more. One call for all of your environmental and geotechnical product needs.

### GEOTHERMAL

---

Our IGSHA certified staff can provide quality products and solutions for both geothermal installations and geothermal drilling.

### HDD

---

A full line of Ditch Witch® and Vermeer® compatible HDD drilling tools and accessories, backed by second to none service and support.

### MINERAL EXPLORATION

---

Quality, innovative tooling, and accessories to support all methods of exploratory drilling. Large on-hand inventory and worldwide shipping capabilities.

### ROTARY

---

A vast inventory of tooling and accessories to service air, mud, and reverse circulation rotary drilling operations.

### SONIC

---

World class tooling, designed and manufactured specifically to withstand the rigors unique to sonic drilling. On-site solutions you just can't find anywhere else.

### Use of Trademarks, Company Affiliations and Other Legal Disclaimers.

# **Force DPT**

**Direct push tooling.**

Direct Push Technology (DPT) utilizes direct push (probe) rigs to push tools and sensors into the ground to advance sampling devices and geotechnical or analytical sensors into the subsurface.

Direct Push is often the preferred drilling method for geotechnical and environmental projects. Cost effectiveness, versatility, and efficiency are some of the many advantages of direct push. In addition, probes produce minimal cuttings and waste, thus saving time and reducing overall job-site costs associated with handling, removal, and clean-up of waste often associated with other traditional drilling methods.

To service the Direct Push market, Hole Products brings you **Force DPT**. The **Force** line of world class, industry compatible tooling includes: tooling systems ranging from 1.25" – 4.50", soil sampling systems, groundwater sampling and assessment systems, field accessories, and much more.

With an unrivalled inventory, in-stock at multiple locations throughout the US, coupled with Hole Products sales, service, and distribution network, Force DPT provides drillers the direct push alternative they've been waiting for.

Please contact a **Force** representative for additional details, product availability, or assistance ordering **The Genuine Alternative!**

*Products listed in the catalog are representative of the most common industry sizes and styles.  
Please contact your Hole Products representative for additional product offerings.*

# SOIL SAMPLING SYSTEMS

The **Force** line of Direct Push Tooling includes a complete offering of single rod and dual tube soil sampling systems. Innovative manufacturing techniques coupled with world class raw materials ensure optimum performance, durability, and effective core recovery in a variety of overburden drilling conditions.

## Single Rod Systems:

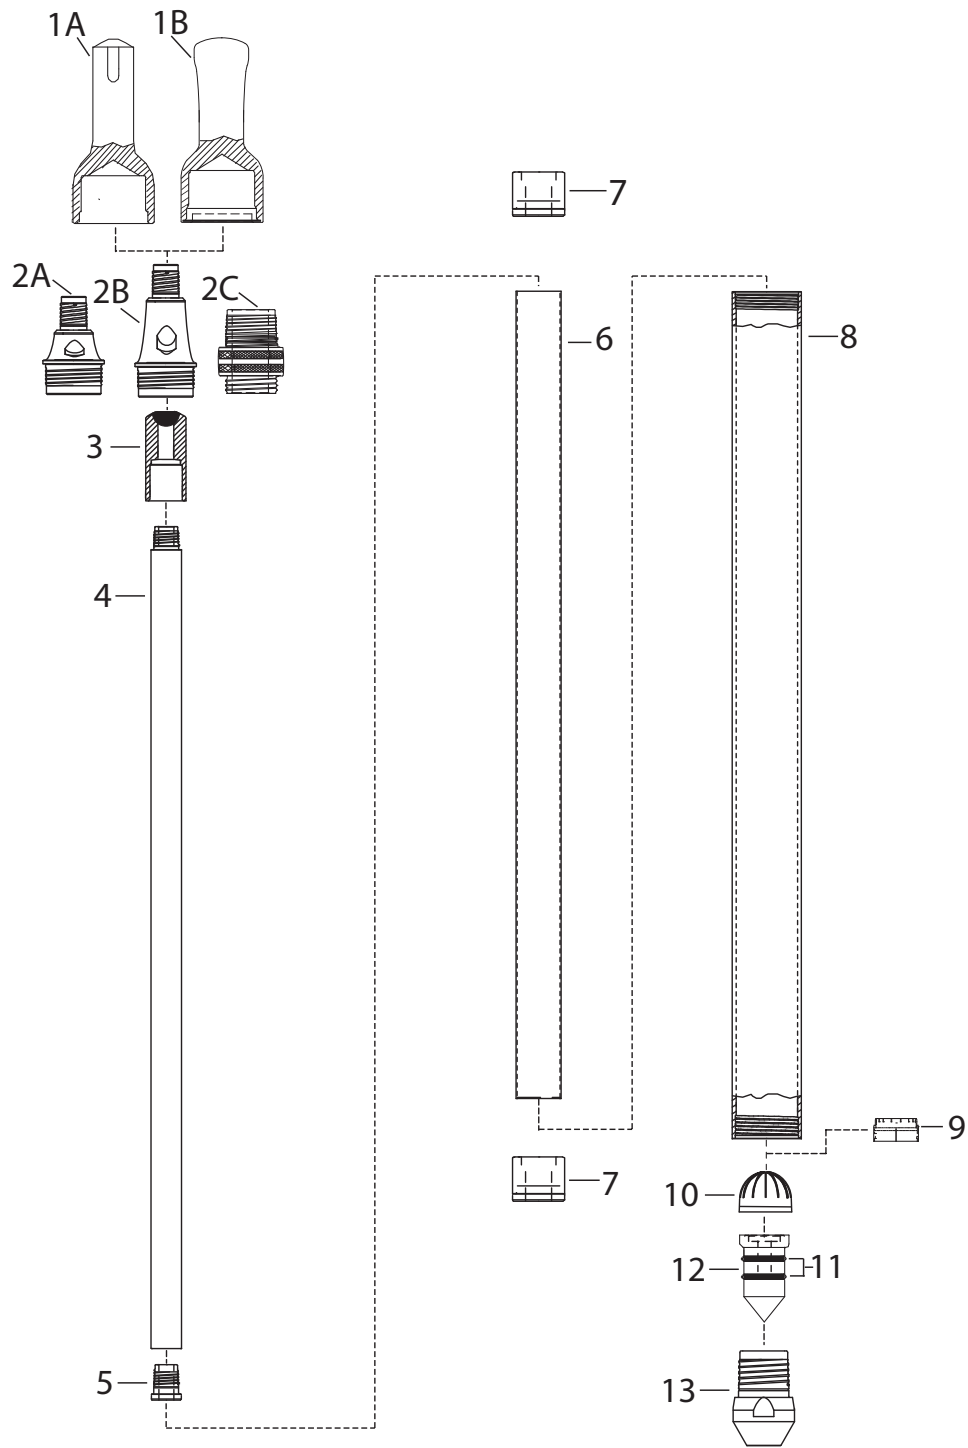

Single Rod Systems utilize a single rod string to connect the sampling equipment to the rig. After being advanced into the formation to depth, the entire drill string must be retracted to collect the sample. The **Force** offering includes MC5 and MC7 conventional single rod systems offering tried and true simplicity and efficiency.

## Dual Tube Systems:

Dual Tube Systems combine an inner and outer rod string. As the system is advanced into the soil, the soil sample is collected in a sample tube connected to the inner rod string. When at depth, the inner rod string is retracted to collect the sample. The outer rod(s) remain in the ground, thereby serving as a casing for the inner rod string. Dual tube systems offer a number of advantages including preventing cave-ins, sealing off formations from above, and providing the ability to complete a number of additional sampling and monitoring tasks in the borehole. Complete DT22, DT325, DT35, DT37, and DT45 systems are in stock and ready for delivery.

Please contact a **Force** representative for additional details, product availability, or assistance ordering **The Genuine Alternative!**

## GROUNDWATER SAMPLING & ASSESSMENT SYSTEMS

**Force DPT** offers groundwater sampling systems designed to economically and effectively obtain groundwater samples in unconsolidated formations, thus allowing the groundwater to be assessed for potential contamination during environmental site investigations.

The **Force SP16 and SP22** samplers are used in temporary installations to allow for quick discrete water sample collection. Upon completion of sampling activities these systems are extracted from the subsurface formation and reused for subsequent sampling events.

For small diameter monitoring well installations, **Force** offers a complete line of **Prepacked Screens and Accessories**. Prepacked screens allow for faster and more consistent installation than conventional monitoring well designs. **Force** prepacks are available in .75", 1.00", 1.50", and 2.00".

Please contact a **Force** representative for additional details, product availability, or assistance ordering **The Genuine Alternative!**

## TOOLING & ACCESSORIES

**Force DPT** includes a comprehensive line of additional direct push tooling and field accessories to meet the needs of even the most demanding project requirements.

Included in this section are expendable points and holders, solid points, pull caps, probe rods, extension rods, rod wipers, subs and adapters, retainer wrenches, and nylon brushes. These accessories are available in all sizes to complement our complete line of tooling, soil sampling, and groundwater sampling systems.

Everything a direct push drilling operation could need and more!

Products listed in this section of the catalog are representative of the industry's most common sizes and styles. Custom tooling and additional sizes are available upon request.

Please contact a **Force** representative for additional details, product availability, or assistance ordering **The Genuine Alternative!**

# PROBE RODS

**Force** probe rods are manufactured using the industry's most cutting edge techniques and from a higher grade of alloy tubing, allowing for a tougher and harder heat treating process. Our unique thread gauging process ensures full compatibility with OEM threads, and our stringent tolerances enable us to make threads that are substantially more consistent than the competition. This adds up to a more durable and longer lasting industry-standard probe rod.

## OUR COMPANY

Hole Products is a leading global provider of high performance drilling supplies, tools and equipment to the direct push, environmental, geotechnical, geothermal, HDD, mineral exploration, rotary and sonic drilling industries.

We combine hundreds of years of drilling supply and service experience, a vast inventory, multiple stocking locations, and worldwide shipping capabilities. Our drilling tools are preceded by extensive R&D, field tested, and backed by our unmatched commitment to service and support.

In addition, our diverse team offers industry leading inventory management, sourcing, logistics, troubleshooting, and product innovation solutions.

Call now, to discover the Hole Products advantage!
